DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Hiyokawa et al. (U.S. Patent No. 6,333,702).

As to claim 2, Hiyokawa et al. disclose a map information device comprising a storage unit for map data (see col. 1, lines 45-50; col. 7, lines 51-63); a route search unit for searching for a route between two geographical points (See col. 1, lines 40-43; col. 2, lines 36-59); a processor unit to simplify the figure of the route by reducing a number of nodes on the route (finding a shortest/closest road to the present position is considered as reducing the number of nodes; see col. 8, lines 1-8, 31-38); a map search unit to then search for map data for the area of the simplified route from a map database and to output the map data of the area of the simplified route (See col. 9, lines 8-26).

Allowable Subject Matter

Claims 1, 3-9, 11, 13-19 allowed.

Claims 10,12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art fails to disclose that the map data is based on rectangular coordinates, wherein the area generator unit establishes the area by correcting a width of the area based on latitude values of the route.

Response to Arguments

Applicant's arguments with respect to claims 1-19 have been considered but are moot in view of the new ground(s) of rejection.
